Languages & Frameworks:
Python, JavaScript, React.js, Node.js, Express.js, Prisma, Next.js, Supabase
Databases:
MongoDB, SQL
Additional Tools
Git, VS Code, Postman
Soft Skills:
Problem-solving, Team collaboration, Fast learner

PROJECTS

DigitalNove
DigitalNove is a real estate listing web app built with the MERN stack. Users can register, log in, and post property listings. It includes features like property search, filtering, and full CRUD operations. The app has a responsive design and is deployed using Netlify (frontend) and Render (backend).

EXPERINCE

Full satck Developer Internship (Nexium)
Remote Internship where I built two mini projects (Quotes Suggestions and AI Translator) and a final major project, an AI Recipe Generator using Next.js, MongoDB, Supabase, and AI agents. I also learned AI automation tools like n8n and Activepieces, and created agents such as an email responding agent.

Backend Developer Internship (Hirebrdige)
Handled backend development of the HireBridge website, including user authentication, application submission workflow, email notifications, secure data handling, and optimized APIs to ensure a reliable and scalable platform.
